

Thank you for your interest in Capitol Electronics and Response Technologies school safety solutions. As part of the Ohio Schools Council Purchasing Co-Op we are pleased to provide the following resources:

- Gunshot Detection (Indoor facility)**
- Panic/Duress Systems**
- Speaker/Strobe Alerting PA/GA**
- Security/Perimeter Alerting**
- Environmental Alerting**
- Weather/Tornado Alerting**

Our school panic system is the fastest way to directly alert law enforcement. It is self-contained and does not require third party monitoring fees or reoccurring fees. It does not rely on a third-party person in remote locations to alert local law enforcement. It is completely wireless and easily installed. It is a one-time purchase under a grant application (no reoccurring/maintenance fees). Our system can alert portable radios carried by SRO's or local police with no delay in response. It also provides phone calls, texts, or emails to 911, first responders and school officials. Each panic button is customizable by who gets what message and how they receive it. It is scalable and can service one school or an entire school district with multiple buildings.

Initiating alerts can be activated by panic buttons, PC keystrokes, wearable pendants and/or Bluetooth enabled GPS anywhere alerting keycards. We can provide a customizable solution for any school's needs.

We can also provide weather alerting systems, speakers, strobes and lightning detection and prevention systems. We are happy to assist you in designing a system that meets your needs.

Sincerely,

Wendy Justice
