CAPITOL ELECTRONICS WHO WE ARE

We offer the quickest Direct to Responder active shooter solutions on the market. When a gunshot is detected, or a door prop sensor or panic button triggered, our system will send an immediate emergency notification to first responders within two seconds. Delivery methods can include any combination of email, text, phone, computer software or the fastest form of emergency contact: two-way radio to SRO's or local police. Pre-determined, customizable messages provide location and type of emergency to the desired recipients. Bluetooth enabled badges provide anywhere GPS panic buttons. No annual fees or third-party monitoring.

SEVIER COUNTY SCHOOLS TESTIMONIAL

"Their solution immediately stood apart because they already had a strong relationship with law enforcement. For me, that meant a built-in level of trust," Rohrer said. Solutions by Capitol Electronics are recognized as the world's fastest duress and emergency response systems in addition to offering an evolving portfolio of emergency notification solutions.

GARY ROHER

VP of Technical Solution, Knoxville, TN

DIRECT TO AUTHORITIES

For active shooter events, get the fastest delivery method available: direct to two-way, portable radio. Immediately alert local SRO's and police via radios while simultaneously calling 911 dispatch and texting/emailing school authorities in a customizable multi-layered approach at disseminating alerts.

DIRECT TO PERSONNEL

For door propping or environmental alerts such as flooding, fire, temperature or power outage; send messages via radio, phone, text or email to custodial staff and school authorities. Monitoring the condition and safety of the school overnight and during holidays prevents disasters.

MULTIPLE DURESS SOLUTIONS

Manually activate alerts from panic buttons, wearable pendants, GPS bluetooth cellular or PC keystrokes. The ability to install sensors providing automatic activations for gunshot detection, door propping, intrusion or other environmental monitoring devices.
