

A Proven Solution for Schools to Support Struggling Readers

Neuralign is an **evidence-based** corrective learning program designed to help students overcome reading and learning challenges, including dyslexia. Our scalable, data-driven approach provides schools with the tools to **enhance literacy outcomes** and support diverse learners effectively.

WHAT DISTRICTS GET WITH NEURALIGN

Faster Reading Gains

Students improve fluency by up to 50% in about 10 weeks.

Grade-Level Catch-Up

Average gains of 2+ grade levels in ~40 hours.

Works Without Adding Staff

Minimal training and oversight, no extra personnel required.

Clear, Real-Time Data

Administrators and teachers see progress instantly.

Stronger ROI

Quicker results justify intervention investment.

Evidence-Based & Proven

Trusted by schools to deliver measurable literacy gains.

1 in 5 STUDENTS

Struggle with reading due to dyslexia or related language-based challenges.

Neuralign improves dyslexic students' reading by an average of **50% in 10 weeks**, according to a report by the Center for Applied Cognitive Research.

Other studies show that **99% of students** improve by at least **two grade levels** after 12 weeks.
