

MEET

Make coding approachable and fun with [LUMA](#), Pitsco's **NEW programmable robot** for students in Grades 4-6! LUMA shines a spotlight on coding, robotics, and careers through engaging, student-driven content.

EXPLORE LUMA

Get Started Easily

LUMA is ready to program out of the box – no coding experience needed for the teacher or student. The app is 100% web-based with no downloads necessary.

Real-World Coding & Robotics

Students learn about the applications of computer science and robotics skills across a variety of industries.

Cross-Curricular Learning

LUMA is a great fit for teachers who want to incorporate coding into core subjects such as English, math, music, and art.

Career Exploration

Learners explore careers that utilize computer science skills, including an inventor, restaurant owner/chef, architect, sound engineer, event specialist, and game designer.

Classroom Ready

Everything educators need to get started is included – a teacher's guide, solution code, and PowerPoint presentations on coding and technology concepts.
