MB400 BUSINESS BAND TWO-WAY RADIO

Increase productivity and add valuable hours to your day with the MB400 Industrial Grade Business Band two-way radio. Connect instantly with co-workers, check status on a project or just "get the word out" with a push of a button. Receive the information you need when you need it, instead of searching for your co-worker.

DURABLE, RELIABLE

The BizTalk series is ready for use right out of the box. They can be easily programmed with our simple step-by-step software. No training is required to operate the radios, easing costs and saving valuable time in high-turnover industries.

IP67 PROTECTION

Designed for demanding environments, the MB400 has a die-cast metal inner frame and an IP67 Rating to ensure it will hold up in the harshest of workplaces, from construction to manufacturing.

CONFIGURABLE

The MB400 is preprogrammed and ready to use out of the box, but if you need to change its programming, you can do so with our easy to use Programming Software. Select from a menu of 99 Business Band Frequencies or what features to turn on/off to configure your radios to the way to want them.

BILINGUAL

The MB400 has English or Spanish voice prompts to let you know what channel you are on, when to charge your battery or what feature you turned on/off.
