

We work where you work

Proudly Announcing Our Xerox Partnership

We Make Work, Work
xerox

We're thrilled to announce our new partnership as an authorized Xerox channel partner. By aligning with Xerox, we're dedicated to delivering advanced office solutions that elevate your business efficiency and performance. Take a look below at the new benefits this partnership delivers for you.

SECURITY

Security is a top priority for us, and we know it is for your business too. Whether you choose to connect your workhorse to in-house or cloud-based solutions, ConnectKey Technology uses the highest levels of security, ensuring your device and data are kept completely safe and secure.

Xerox's commitment to innovating for a better tomorrow has earned the company recognition as one of this year's Corporate Knights' Global 100 most sustainable corporations in the world. We are making inroads toward our goal of reaching net zero by 2040 through our innovative solutions and our best-in-class energy efficient products.

SUSTAINABILITY

CLOUD

92% of people in mid-sized organizations use multiple devices every day. To do their best work from anywhere, your people need safe access to the right files, folders, and information. **Xerox® Workplace Cloud** is easy to set up and use, so it's the ideal choice for businesses with limited access to IT. And because it's a cloud-based solution, it works across multiple networks, giving you complete control of every printer at every location.

Xerox has the largest breadth of solutions – from standalone print devices to affordable mobile and cloud enabled workplace assistants from a trusted company with solutions like Workflow Central, DocuShare, and XMPie. Most printers are Wi-Fi enabled, ready to work right out of the box, delivering the reliability your customer needs to stay productive.
