Designing Better Futures

Our Services

- Architecture
- Assessments
- Code Evaluation
- Community Engagement
- Community Planning
- Computer Generated Renderings
- Conceptual Design Studies
- Construction Administration
- Construction Document Services
- Construction Reviews
- Cost Estimates
- Energy Modeling
- Engineering (Civil, Electrical, Mechanical, Plumbing, and Structural)
- Interior Design
- Environmental Graphics & Wayfinding
- Facility Security
- Furniture, Fixtures and Equipment Coordination
- Grant Writing
- Landscape Architecture
- LEED & WELL Certification
- Lighting Design
- Master Planning
- Move Coordination
- Planning
- Programming/Scope Definition
- Retaining Walls
- Riverfront Development
- Roadways
- Shared-use Trails
- Shell and Fit-Out Construction
- Sidewalks
- Signage, Graphics, Artwork and Plantscaping
- Space Planning
- Specialty Science & Technology Labs
- Specifications
- Stormwater Detention/Retention
- Streetscapes
- Sustainable Design
- Telephone & Data
- Urban Design

Cincinnati College Prep Academy Master Plan/ Classroom Addition

CCPA's High school program needed larger and better space to achieve student success. In outgrowing the existing facility– the former West End Health Center – a need was identified for five additional, specialized classrooms to facilitate more authentic learning. The existing site has adequate space to accomodate these plans, so KZF engaged in a design process which began with Visioning. This included the development of a CCPA High School Master Plan and a Concept Design based on the Master Plan, before moving into schematic design and eventually construction documentation for Phase 1.

Summit Country Day Campus Master Plan

KZF Design is providing complete and comprehensive design services for a Master Plan for this K-12, private, co-educational school serving approximately 1000 students, located in the Cincinnati suburb of Hyde Park. The Master Planning process is being done in conjunction with a Strategic Plan Process.

Project tasks include, but are not limited to, evaluating current space allocations and adjacencies for educational instruction, classroom furniture, sports facilities onsite and offsite, dining services, libraries, and administrative offices.

The Miami Valley School Student Commons Renovation

KZF is providing Project Management, architecture, interior design, MEP, and civil/structural engineering to add a floor within an existing gymnasium space to create a new central cafeteria and kitchen for the school, as well as an upper-level commons, classrooms, innovation labs, a student learning support area, and college counseling offices and meeting space. The project also included planning, focus group, and sustainability sessions and meetings with parents, faculty, and staff.
