Imagine the convenience of having your drivers tested at your facility. No more trips to medical centers and long waits once your people get there. We come to you and test your drivers at your location. We keep track of your random lists and manage all of your D.O.T. compliance issues. You can access your information at any time with our web based reporting system.

Does the end of the school year have you scrambling to keep your drivers certified? We have the solution to your problem. With our on-site T8 physical program, we come to you! We schedule a date and time that works well with your district, and arrive with our certified medical staff to perform those physicals. Saving your district time and money! We request 25+ drivers to come onsite. Don't have 25? Contact us and we may be able to combine schools.

Your drivers can also come to our facility at any time. No appointments necessary.

M - F	9:00a - 5:00p
Sat	9:00a- 2:00p
